BULLETIN February 8,

## Can Extra Tall Towers Be Lowered ??

**Gale Brewer, our Manhattan Borough President, knows so.**

**February 11, Monday Evening, 6:30 PM**

**Church of Latter Day Saints  
125 Columbus Ave  
Between W65th & W66th Streets  
3rd Floor**

Please join Gale together with her office's Urban Planner Lizette Chaparro as they explain why newly designed tall towers have become "extra tall towers" through the use of here to fore accepted multi story hollow mechanical voids. These voids have legally raised building height in order to give upper floor residents much better views and developers much more money.

You are invited to join Gale and Lizette explain plans that will limit "voids" and other ideas. Already, the planned 775 foot extra tall tower (equivalent to 75 stories) between CPW and Columbus Ave on W 66th St has been halted.

This event sponsored by the W65th & W 66th Street Block Association.

## NYPD Community Update

Many residents attended our Community Policing Officers presentation on January 23 at Stephen Wise Synagogue. A broad range of issues was discussed -- most notably

### Car Break Ins are on the Rise

## Rodent Control Update

Eliminating rodent nesting areas is the most important step in lowering populations.

**67 Wine and Spirits** is commended for retaining the services of a private extermination company to close up the enormous nesting area within the tree pit in front of the store. With special permit from the Park's Dep't this pit was partially dug up and sealed with a special steel mesh to eliminate any future nesting but yet to enable planting.

We appreciate **67 Wine** bearing this costly expense after it observed repeated actions by NYC and The Columbus Ave BID proved ineffective in eliminating this substantial infestation.

## The Lincoln Square Business Improvement District to Host Community Breakfast Featuring NYPD 20th Precinct Commanding Officer Timothy J. Malin

**March 6, Wednesday, 8:30 am**
